Insulated tubing sets are available for all Friedrich split systems in 15 ft. and 35 ft. lengths. Each tubing set is equipped with flare nuts on both ends. Both liquid and suction lines are insulated. Tubing sets can be joined together with field-supplied double female flare connectors. Each system requires one tubing set unless otherwise noted above.

SYSTEM MODEL NO.	VOLTAGE	KIT NUMBER	LIST PRICE
<b>LOW AMBIENT CONTROL KITS</b>			
C24CC S22CE	230/208	HPC - 8	\$ 300.00

When cooling is required year round, a low ambient kit is available to regulate the condenser fan speed. This head pressure control is factory calibrated and does not require adjustment. Designed to effectively operate down to an outdoor temperature of 30 degrees Fahrenheit. Continuous operation below 30 degrees Fahrenheit may reduce the life of the fan motor due to onstant cycling. Minimum outdoor operating temperature is 0 degrees Fahrenheit.

\*NOTE: All other models (except M18DCD) are designed to operate safely to 41degrees Fahrenheit or lower.
