

PHILCO

Built to the Standards of two Eras

PACKAGE EQUIPMENT
THAT COMBINES THE TECHNOLOGY OF TODAY
WITH A HISTORY OF QUALITY.

PHILCO 
Heating and Cooling Products

What are the advantages of a new package system?

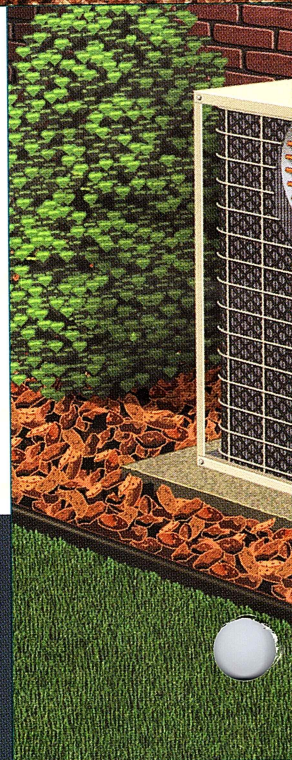

Purchasing a new heating or cooling system is not as simple as replacing other household appliances. In most cases, the decision to buy is the result of the unexpected – a loss of heat in the cold of winter, or a loss of cooling on a hot summer day.

So, when it's time to replace a whole system or a single unit, you should know that a new system could save you 10-30% on your energy bill over older units. Your Philco contractor will help you determine the ideal solution for your home while quickly getting you comfortable again.

**QUALITY COMPONENTS.
LASTING PERFORMANCE.**

Proven components include Copeland® scroll compressors on select models – the choice for efficiency, durability, and longevity.

ROOFTOP/SLAB SERIES: HEAT PUMPS, AIR CONDITIONERS, AND GAS PACKS

- Convertible air delivery allows for horizontal or downflow to accommodate rooftop or horizontal application.
- Corrosion-resistant drain pan quickly drains away evaporator condensate.
- Proven, industry standard components ensure easier service and availability.
- Fan blade and custom condenser fan orifice delivers quiet operation.
- Full line of accessories for commercial applications include roof curbs, economizers, and fresh air dampers.
- Heavy-gauge, full-perimeter base rails mean easier handling and mounting.
- Six-year warranty on all parts. Six-year compressor warranty on 10 SEER models, and a 10-year compressor warranty on 12 SEER models.

SMALL PACKAGED HEAT PUMPS AND AIR CONDITIONERS

- Plastic-coated grille and plastic mesh protects coils from damage by extreme weather or flying debris – will never rust.
- Copper tube/aluminum fin coils optimize heat transfer and increase durability and reliability.
- Permanently-lubricated motor delivers long-lasting reliability and quiet operation.

ENERGY EFFICIENT HEATING AND COOLING

High-quality, energy-efficient package equipment for any residential or commercial application. Ask your contractor to recommend a system to fit your needs.

PHILCO 
Heating and Cooling Products

SIX-YEAR WARRANTY

A manufacturer's confidence in the quality of their product is demonstrated in the warranty they offer. We offer one of the best warranties around – six years on all parts and a ten-year warranty on the heat exchanger. You may also select an extended six or ten-year labor protection plan. Ask your Philco contractor for specific details on warranties, utility rebates, and consumer financing programs.

QUALIFIED AND KNOWLEDGEABLE CONTRACTORS

Selecting a heating and cooling contractor can be a difficult process. Looking for someone you can trust to guide you safely through the confusing world of upflows, downflows, SEERs and AFUEs can be intimidating. A qualified and knowledgeable Philco contractor can analyze your situation and recommend the perfect system for your needs. You can have confidence in a new system that combines the technology of today with a history of quality.
