HOW TO USE THE GAS FURNACE REFERENCE GUIDE

Inspect the unit

Locate the equipment nameplate. Determine the brand, make, model number and input capacity in Btu's. Record the information on your estimate worksheet. Only natural gas or dual-usage natural or propane models are listed. No propane gas only are listed.

If all the information is not available or if the nameplate is obscured or missing, refer to the Gas Furnace Identification listings on pages 4 and 5.

While talking to the customer, try to get an idea of when the equipment was installed or ask if the owner's manual or service records are available. This information will help you ascertain the approximate age of the equipment.

Look Up Listing

The equipment listings for all gas furnace manufacturers are on pages 32 through 333. An index to those listings is located on pages 335 and 336.

How to Read Listings

Gas furnace capacities are listed by Input BTUH. The manufacturer's name is located at the top of each page or at the start of the listing. The manufacturer's listing identifies the year of manufacture, model number, heating capacity and efficiency (1982 through 1993 only).

HOW TO USE THE OIL FURNACE REFERENCE GUIDE

Inspect the unit

Locate the equipment nameplate. Determine the brand, make, model number and input capacity in Btu's. Record the information on your estimate worksheet.

If all the information is not available or if the nameplate is obscured or missing, refer to the Oil Furnace Identification listings on page 2.

While talking to the customer, try to get an idea of when the equipment was installed or ask if the owner's manual or service records are available. This information will help you ascertain the approximate age of the equipment.

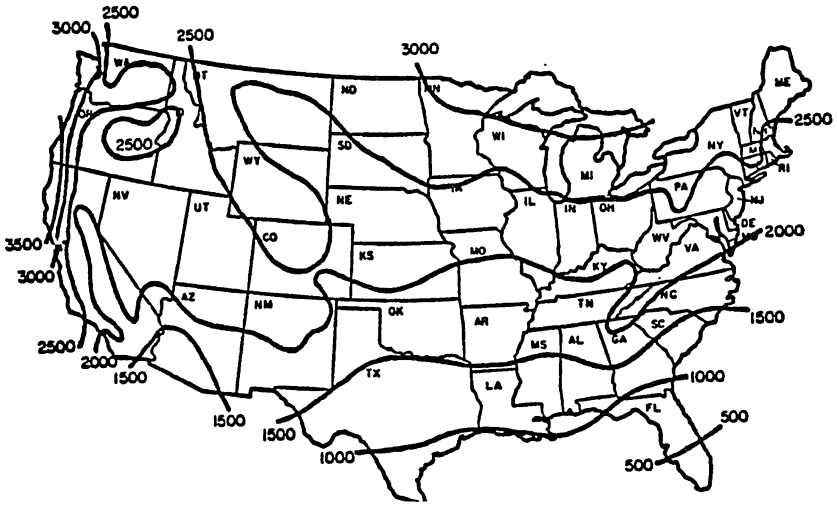
Look Up Listing

For oil furnaces manufactured after 1982, look up the manufacturer's listings are on pages 7 through 31. An index to those listings is located on page 334.

How to Read Listings

Oil furnace capacities are listed by Input BTUH. The manufacturer's name is located at the top of each page or at the start of the listing. The manufacturer's listing identifies the year of manufacture, model number, heating capacity and efficiency (1982 through 1993 only).

HEATING MAP



The DOE zone map reflects the estimated number of degree days throughout the continental United State and Canada for evaluating the number of furnace operating hours.

PUBLISHER'S NOTE

There has been dramatic growth in the number of heating and air conditioning units since the last edition of the Blue Book™: more than 60,000 air conditioner and heat pump listings have been added since 1987, bringing the total to over 128,000 listings.

In this new edition, 24 manufacturers have been added while, many others have gone out of business or were absorbed by the major manufacturers. The trend continues of fewer companies making more equipment under a variety of brand names. There are now over one thousand model and brand names listed in the Equipment Identification listings. No wonder it's difficult for residential HVAC sales and service people to keep current in this changing marketplace!

In response to dealer requests, this updated edition includes all makes and models through 1993, making it the most extensive and authoritative single-volume reference in the industry.

We reserve the right to issue and recall existing editions of the Blue Book. Capacities, ratings, and other technical data are estimates and subject to modification and correction.

We hope that the Blue Book will continue to be one of your most useful sales and service tools.

THE BLUE BOOK
OF AIR CONDITIONING

1967-1993 REFERENCE GUIDE

1994 EDITION

USED AIR CONDITIONERS AND HEAT PUMPS

PUBLISHER'S NOTE

There has been substantial growth in the number of heating units listed since the last edition of the Blue Book™: more than 31,000 furnace listings have been added since 1987, bringing the total to over 91,000 listings.

In this new edition, 22 manufacturers have been added while, many others have gone out of business or were absorbed by the major manufacturers. The trend continues of fewer companies making more equipment under a variety of brand names. No wonder it's difficult for residential HVAC sales and service people to keep current in this changing marketplace!

In response to dealer requests, this updated edition includes all makes and models through 1993, making it the most extensive and authoritative single-volume reference in the industry.

We reserve the right to issue and recall existing editions of the Blue Book. Capacities, ratings, and other technical data are estimates and subject to modification and correction.
